prevemaX

30 YEARS

AS A BENCHMARK FOR
QUALITY AND **RELIABILITY**

Prevemax - About Us

We started in 1996 as a small company and have grown to become one of the world's largest manufacturers of waterproof and disposable products. As pioneers in the manufacturing of waterproof and disposable garments, we provide smart solutions that help protect people and processes.

We focus on becoming more competitive, connected, and efficient while contributing to global development. With more than 21,000 square meters of production and warehousing facilities, we provide solutions for over 60 business segments and have built a presence that extends through partnerships across Latin America and around the world.

Our work is focused on ensuring people's protection while maintaining care and efficiency throughout our processes. This inspires us to continue crossing borders and taking our products even further through the company's international expansion. We have established global and strategic partnerships and serve more than 15,000 customers. Today, we are present in several countries through both imports and exports, taking our global vision beyond borders, supported by commercial structures that enable us to serve markets worldwide.
